

Esegui le addizioni con “riporto” utilizzando il trasformatore.

Si dispongano i blocchetti delle unità sulle zone di applicazione dei numeri. I blocchetti delle unità vengono poi asportati dalle zone di affissione dei due numeri 5, e posti sotto la linea dell'operazione.

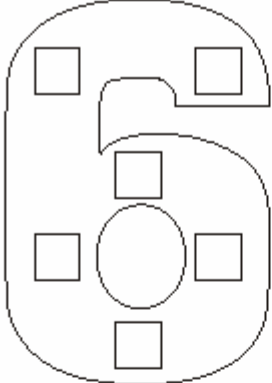

Si utilizzi il trasformatore per cambiare dieci blocchetti neri con un blocchetto blu (decina), i dieci blocchetti neri vengono posti nel raccoglitore. Quindi si collochi lo zero sotto la linea dell'operazione. Si trasporti il blocchetto blu (decina) sul numero che lo contiene, cioè sull'1.
